

OnTrack Core Fund Note 20-12-01

Prepared by Lee Harris on 12/01/2020. Data from 11/30/2020.

SYMBOL (OTRFX/OTRGX)

Performance is not just about total return. For investors approaching or in retirement, risk management becomes ever more important. The decline this year was just over 38% in the New York Composite, but what if the market had continued significantly lower? Losses experienced in the previous two major bear markets were devastating to many retirees.

The OnTrack Core Fund limited drawdown to -4.72% this year by moving to a defensive posture or cash (money markets) during most of the steep March decline. Had stock markets continued lower, capital invested in the OnTrack Core Fund would have been protected. This risk managed approach to investing is what differentiates the OnTrack Core fund from most other mutual funds. The advice of most investment managers is to just hold through such market declines, but that is not the approach followed by Price Capital Management. Just because most major market indices recovered their losses this year does not mean that will always be the case.

November was a good month for stocks and our intermediate-term outlook remains positive. The OnTrack Core Fund is still fully invested and leveraged, primarily in low volatility bond and income mutual funds. There is always risk in investing. Our goal is not to eliminate all risk, but to use risk management to avoid life-changing losses that can be experienced in major bear markets.

Any performance quotes represent past performance. Past performance does not guarantee future results. Investment return and principal will fluctuate, so that shares, when redeemed may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reinvestment of any dividend and capital gains distributions

The contents of this OnTrack Core Fund Note do not constitute an offer to sell or a solicitation to buy a security, and are not an offer to provide any specific investment advice. Securities held in the OnTrack Core Fund are subject to change without notice. Disclosures

Objective: The OnTrack Core Fund seeks total return while keeping the Fund's volatility and downside risk below that of major equity market indices.

Strategy: To seek the Fund's objective, the Fund's subadvisor, Price Capital Management, Inc., uses a flexible investment approach that emphasizes capital preservation, but allows the portfolio managers to adopt a less conservative posture and to increase emphasis on capital appreciation when they believe the additional risk is warranted by favorable market conditions. The subadvisor invests long-or-short primarily in stocks, bonds and commodities using the subadvisor's technical and risk control strategies.

The subadvisor's technical strategy is based on a form of technical analysis known as "chart analysis" that attempts to invest in up-trending assets that are expected to produce above average risk-adjusted returns. Up-trending assets are those with generally rising prices and down-trending assets are those with generally falling prices. The subadvisor also uses this technique to take short positions in down-trending assets.

The principal risks of investing in the OnTrack Core Fund are Risks of the Subadvisor's Investment Strategy, Risks of Aggressive Investment Techniques, High Portfolio Turnover, Risk of Investing in Derivatives, Risks of Investing in ETFs, Risks of Investing in Other Investment Companies, Swap Agreement Risks, Risk of Asset-Backed Securities, Leverage Risk, Risks of Shorting Securities, and Risk of Non-Diversification. For more information on the risks of the OnTrack Core Fund, including a description of each risk, please review the prospectus carefully.

There is no guarantee that the OnTrack Core Fund will achieve its objectives. Investing in a mutual fund involves risk, including loss of principal.

Price Capital Management, Inc. serves as Investment Subadvisor to the OnTrack Core Fund, distributed by Ceros Financial Services, Inc. (member FINRA/SIPC). Ceros Financial Services, Inc. and Price Capital Management, Inc. are not affiliated entities. Advisors Preferred, LLC is the Fund's Investment Advisor. Advisors Preferred, LLC is a wholly-owned subsidiary of Ceros Financial Services, Inc.

Market indexes. Market indexes are included for comparative purposes only and should be used solely as context reflecting conditions in the general market or specific sector. The Fund does not seek to replicate - and can be expected to differ materially from - the composition, performance or volatility of any such index. Accordingly, no representation is made that the Fund's composition, performance or volatility are intended to track or otherwise be similar to any such index. It is not possible to invest directly in any index

S&P 500 Index: The Standard and Poors 500 Index is a capitalization weighted index of 500 stocks representing all major domestic industry groups.

NYSE Composite Index: The NYSE Composite Index (^NYA) is a stock market index covering all common stocks listed on the New York Stock Exchange, including American Depository Receipts, real estate investment trusts, tracking stocks, and foreign listings.

Barclays Capital Aggregate Bond Index: The Barclays Capital Aggregate Bond Index provides a measure of the performance of the United States dollar denominated investment grade bond market, which includes investment grade government bonds, investment grade corporate bonds, mortgage pass through securities, commercial mortgage-backed securities and asset backed securities that are publicly for sale in the United States.

Dow Jones Industrial Average: The Dow Jones Industrial Average is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange and NASDAQ.

Russell 2000 Index: Russell 2000 is the Russell 2000® Index, which is a total return index comprised of the smallest 2000 companies in the Russell 3000 Index, representing approximately 11% of the Russell 3000 total market capitalization.

NASDAQ Composite Index: The NASDAQ Composite Index is a market-value weighted price return index measuring all NASDAQ domestic and non-U.S. based common stocks listed in the NASDAQ Stock Market.

Merrill Lynch High Yield Master II Bond Index: The Bank of America Merrill Lynch US High Yield Index tracks the performance of short-term US dollar denominated below investment grade corporate debt publicly issued in the US domestic market.

©2020 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™, for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes.

The Morningstar Rating™ is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

FUND PERFORMANCE As of September 30, 2020

	QTR	YTD	1 Year	3 Year	5 Year	Since Inception*
OTRFX	4.67%	21.03%	23.62%	7.46%	7.24%	4.99%
